The
SAFEST
LIFT in the
WORLD!

Ultralift^{PLUS}+

- Eclipse Lifting Eye Mechanism - guarantees the load cannot be dropped under tension (*patents pending*).
- The Eclipse **Ultralift Plus™** is the only permanent magnetic lifter to come complete with the 'Safety Shim' system. (Internationally patented).
- Guarantees a 3:1 Safety Factor irrespective of unknown weights, poor surface condition, thinner sections etc.
- Removes all doubts and uncertainties regarding safe lifts.
- Is quick and easy to use.

"A revolution in the safety of magnetic lifting"

www.eclipse-magnetics.co.uk

How easy is it to use?

The **Ultralift Plus™** is so simple to use, it functions under the same principles as the Ultralift. Once the 'Safety Shim' test has been completed you simply lower the **Ultralift Plus™** onto the work piece, then by depressing the button on the safety handle (like a car handbrake) the handle can be turned through 120° until it locks under the safety catch - the component can now be lifted. At this stage the Lifting Eye is under tension, activating the operating handle isolator, guaranteeing the load cannot be dropped by accidental switching.

The safety load isolator incorporated in the unique lifting eye mechanism combined with our patented 'Safety Shim' means that

Safe just got Safer.

- 1 Lifting Eye Mechanism
- 2 Safety Catch
- 3 Operating Handle

Eclipse Ultralift Plus™ Magnet Specifications

Model Number	Unit Weight	Flat SWL	Min Thick.	Round SWL	Max Dia.
UL0125+	4kg	125kg	20mm	50kg	200mm
UL0250+	11kg	250kg	25mm	100kg	300mm
UL0500+	27kg	500kg	30mm	200kg	400mm
UL1000+	63kg	1000kg	45mm	400kg	450mm
UL2000+	157kg	2000kg	55mm	800kg	600mm
